

Heart of Texas EAPA Chapter presents:

"Transcranial Magnetic Stimulation for the Treatment of Depression"

presented by

Jaron L. Winston, MD
Texas TMS Center at SASH
Austin, Texas

The NeuroStar TMS Therapy system is the first and only device of its kind to be cleared for the treatment of depression by the U.S. Food and Drug Administration (October 2008). Transcranial Magnetic Stimulation is clinically proven for the treatment of major depression in adults who have failed to achieve satisfactory improvement from prior antidepressant medication. For many years Dr. Winston has been interested in treating patients with mood disorders. He has utilized and recommended many treatment modalities as appropriate including psychotherapy, medications and ECT. He is very excited to be on the cutting edge by treating depressive symptoms with magnetic therapy or TMS.

Wednesday, March 3, 2010
9:00 a.m. - 11:30 a.m.

For over 23 years, Austin-area patients, families, physicians, and professional caregivers have called on Jaron L. Winston, M.D., for his compassion and vast knowledge in the field of Geriatric Psychiatry. Dr. Winston graduated with honors from the University of Texas at Austin in 1977 and received his medical degree from the University of Texas Health Science Center in Houston in 1981. Dr. Winston founded Senior Adults Specialty Healthcare (SASH), P.A., in 1997. He and his staff are conducting clinical trials for groundbreaking new therapies for many disorders including depression. More information can be found on the Texas TMS Center at SASH website, www.texastmscenter.com.
